EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science Engineering | CGPA: 8.33

Bhopal, MP

2023 – Present

Rani Laxmi Bai Memorial School

Senior Secondary Education (CBSE, Class XII) | 85.6%

Lucknow, UP

2022

Rani Laxmi Bai Memorial School

Secondary Education (ICSE, Class X) | 85%

Lucknow, UP

2020

TECHNICAL SKILLS

Languages: C/C++, JavaScript (ES6+), Python, HTML, CSS, SQL

Databases: MongoDB, MySQL, Mongoose ODM

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs, Bootstrap, Tailwind CSS, JWT, bcrypt

Developer Tools: Git, GitHub, Postman, Linux, Figma, Render, Vercel, MongoDB Atlas

Concepts: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems, Agile

PROJECTS

Ledgr — Financial Ledger System

GitHub Live Demo API Docs

Full-Stack Fintech Project

Node.js, Express.js, MongoDB, Mongoose, React, Vite, Tailwind CSS, JWT, REST API

- Architected a double-entry ledger system across **5 MongoDB collections** where account balances are derived from immutable ledger entries rather than stored directly, eliminating balance corruption from concurrent transactions and ensuring a complete financial audit trail.
- Implemented idempotent transaction processing using client-generated UUID keys and atomic MongoDB sessions (`startSession`, `commitTransaction`, `abortTransaction`), guaranteeing exactly-once execution and preventing partial writes on network failures; transaction reversals generate **4 linked ledger entries** to preserve full auditability.
- Engineered role-based access control with JWT authentication, HTTP-only cookie sessions, and server-side token blacklisting on logout; restricted admin operations (transaction reversal, fund seeding) to system users via custom middleware.
- Designed and deployed a RESTful API with **12 endpoints** and Swagger UI documentation, enforcing rate limiting of **10 requests per 15 minutes per IP** on auth routes; deployed full-stack application with React frontend on Vercel and Node.js backend on Render with MongoDB Atlas, achieving **sub-500ms average response times**.

CINEMAX — Movie Streaming Platform

GitHub Live Demo

Full-Stack Web Development Project

React, Vite, Node.js, Express.js, MongoDB, JWT, TMDB API

- Developed a production-quality full-stack movie streaming app with React + Vite frontend deployed on Vercel and Node.js + Express backend deployed on Render.
- Designed a strict 6-layer REST API (Routes → Controllers → Services → Repositories → Schemas → MongoDB) with JWT authentication and bcrypt password hashing.
- Integrated TMDB API via a backend proxy with MongoDB TTL caching, reducing redundant external API calls and serving cached responses in under 50ms.
- Delivered a no-disturbance fullscreen watch page with YouTube trailer embedding, debounced search (300ms), and persistent watchlist via localStorage.

MINI PROJECTS

Hangman Game

Live GitHub

Multiplayer word game built with **React, JavaScript**, and **JSON Server REST** backend

Snake Game

Live

Classic snake game built with **vanilla JavaScript** and **HTML5 Canvas**, deployed on Vercel

Tier List Maker

Live

Drag-and-drop tier list builder using **React** with dynamic state management

EXTRA CURRICULAR ACTIVITIES

- NSS Core Member & Discipline Team Volunteer**, VIT Bhopal (2024 – Present) — Coordinated student logistics at university convocation events; completed a 7-day NSS Special Camp on community service and leadership. [Certificate](#)
- Event Management Team Member**, Android Club, VIT Bhopal (2024) — Handled logistics and participant management for technical events organized by the Android Club.
- NPTEL Certification, Marketing Analytics** (2026) — Completed 12-week course, scored **99/100**. [Certificate](#)
